PROJECTS

Student Complaint Management System | *React.js, Node.js, Express.js, MongoDB, Socket.io*

- Developed a full-stack Student Complaint Management System using React.js, Node.js, Express.js, and MongoDB for digital complaint registration and resolution.
- Implemented complaint classification using Naïve Bayes and NLP techniques to categorize complaints and automate priority-based routing.
- Built a real-time notification and tracking system using Socket.io, enabling students and college administrators to receive instant status updates.
- Integrated JWT authentication, REST APIs, and role-based access control (student, faculty, admin) with a responsive UI built using Tailwind CSS.

Chat Application | *MERN Stack with Socket.io*

- Developed a full-stack real-time Chat Application using React.js, Node.js, Express.js, and MongoDB.
- Implemented real-time one-to-one and group messaging using Socket.io, including instant message delivery and online/offline status updates.
- Integrated JWT authentication and secure REST APIs for user registration, login, and session management.
- Designed a responsive, interactive UI using Tailwind CSS, ensuring smooth performance across devices.
